

Momentum Medicine Plus

E-Prescribing/Medication History Consent Form

Momentum Medicine Plus uses an electronic medical record system (EMR) in which the physician is able to prescribe medications electronically. Non-controlled substances and non-narcotic prescriptions are sent securely through your pharmacy of choice. Controlled substances and narcotic prescriptions are not able to be sent electronically and does require a hard copy prescription. Electronic-prescribing reduces medication errors and increases patient's safety. The patient is aware of the following:

- **Formulary transections:** The physician is able to access information regarding which drugs are covered by the patient's medical drug insurance plan.
- **Medication history:** Allows the physician to access a history of previous and current medications the patient is taking in order to reduce possible side effects.
- **Prescriptions status information:** Allows the physician to receive an electronic notice from the pharmacy informing the physician that the patient's prescriptions has been filled and/or picked up.

I have read the above and have asked any questions that I may have, to the physician and he has explained them appropriately. I give consent that I authorize the access of my medication history and I give permission to the physician to send my prescription(s) electronically.

Patient Name: _____

Patient's Signature: X _____

Date: ____/____/2014
